

?	\hat{u}_s	
\acute{a}	\acute{a}	$a\acute{b}c$
\bar{a}	\bar{a}	$a\bar{b}c$
\breve{a}	\breve{a}	$a\breve{b}c$
\check{a}	\check{a}	$a\check{b}c$
\ddot{a}	\ddot{a}	$a\ddot{b}c$
\dot{a}	\dot{a}	$a\dot{b}c$
\grave{a}	\grave{a}	$a\grave{b}c$
\hat{a}	\hat{a}	$a\hat{b}c$
\tilde{a}	\tilde{a}	$a\tilde{b}c$
\vec{a}	\vec{a}	$a\vec{b}c$
	\hat{a}	
\widetilde{aaa}	\widetilde{aaa}	
\widehat{aaa}	\widehat{aaa}	

Test what arguments hat accepts (should be same with check, breve, acute, grave, tilde, bar, vec, dot, ddot, overline, widehat, widetilde)

$$[\hat{A}] \quad [\hat{A}] \quad [\hat{A}] \quad [\hat{A}BC] \quad [\hat{A}] \quad [\hat{A}] \quad [\hat{\$}] \quad [\hat{A}] \quad [\hat{\$}]$$

Note that this only accents the A

$$[\hat{A}BC]$$

Other accent-like macros (underbrace, overbrace) only accept regular style arguments

$$[\underbrace{A}] \quad [\underbrace{\quad}] \quad [\underbrace{A}] \quad [\underbrace{ABC}] \quad [\underbrace{ABC}]$$

But note that while these don't fail, they accent nothing

$$[\underbrace{\quad}A] \quad [\underbrace{\quad}A] \quad [\underbrace{\quad}A]$$
